

RHEL 2.1 End of Life Notification

Due to compatibility issues with recent versions of the PLB interpreter the support for `glibc 2.2` based Linux distributions will end on 31/12/2007. These systems are typically 5+ years old. Please upgrade you systems in time. The RSI IT Infrastructure department will happily assist you in the upgrade process if desired. Please contact [Gunther Schlegel](#) for further details.

The affected Linux distributions are:

- RedHat Linux 7.0, 7.1, 7.2, 7.3
- RedHat Linux 8.0
- RedHat Enterprise Linux 2.1 (this includes rebranded distributions like White Box Enterprise Linux 2.1 and CentOS 2.1)
- other distributions, which have never been officially supported, are affected as well.
