

# Change in SLAYINC

With freshly compiled versions of programs using SLAY-Screens, a new warning can appear.  
This warning states:

```
Attention: @ truncated!
```

The warning indicates which @number is truncated.

The warning appears only for @numbers whose value is numeric, i.e. weight, pieces, @numbers.

The action necessary is to adapt the corresponding SLAY-Screen,  
so that the value of the @number can be displayed completely without cutting off the value.
